

Installing The Remote Control Switch

Ceiling installation:

Instructions for using a single wall switch to control StarDome™ (stars and cove light), then using the remote control switch for cove light sunrise/sunset

These instructions are for a **qualified electrician** only.

1. Turn off power at panel
2. Run the switch leg (2-wire) from wall switch to single gang box in ceiling near dome (but as discrete as possible).
3. Run a 3-wire from that box to the junction box in dome flange.
4. Hook the wall fed switch leg (black) to the black wire going to dome as well as to one of the dimmer wires. (either one)
5. Hook the other dimmer wire to the red wire going to dome.
6. Tie neutrals (whites) together.
7. At dome hook black wire to outlet black wire for star power supply.
8. Hook red wire to outlet black wire for cove light.
9. Hook white from 3-wire to white outlet wires.
